

LOCAL COMMUNITY OUTREACH

As a result of the attention paid to young people in our country, the Faculty of Psychology and the Psychological Service Center jointly organized [a month-long course](#) aimed at improving the psychological condition of kindergarten children. This course effectively helped children to learn to work as a team.

During the course, paying attention to the concepts of hesitation and fear observed in young children, an additional conversation was organized with the children who were observed in this situation to get them out of this situation, and their parents were also given additional information about this situation. As a result of the cooperation of the parents and the kindergarten, positive changes were achieved in the children who were observed in this situation.

ONE-MONTH PSYCHOLOGICAL COURSE IN KINDERGARTEN

OUTREACH PROGRAM FOR LOCAL SCHOOLS

National university of Uzbekistan usually holds educational outreach outside university complex within kindergartens, schools and universities. This process helps students to study the science deeper and with practical lessons. The more students are given practical lessons, the faster they learn the subject and this leads them to practice their theoretical knowledge that they learnt at NUU.
