17 PARTNERSHIPS
FOR THE GOALS

17.4.2 Education for SDGs: specific courses on sustainability

17.4.2 Education for SDGs: specific courses on sustainability

In order for all professors and students to comprehend the 17 significant Sustainable Development Goals (SDGs) of the UN, National University of Uzbekistan actively promotes the idea of sustainable development across its curricula. Furthermore, NUU is **Uzbekistan's first and largest university for teacher preparation, producing about 10,000 secondary school teachers annually**. By giving teachers training in sustainable development literacy, we create instructors who are forward-thinking and capable of imparting accurate information to the following generation. NUU's advocacy for environmentally friendly education has a significant impact on Uzbek society as a whole.

Human rights education, careers education, education of indigenous ethnic groups, gender equality, environmental education, energy education, cultural diversity education, marine education, rule of law education, and international education are just a few of the course types at NUU that are closely tied to the UN Sustainable Development Goals.

In the **2023** academic year, we had **1450 courses** among 2500 on topics related to the SDGs.
